

RIG LIGHTING

900K LUMENS

Precision's EverGreen™ suite of environmental solutions reinforces our commitment to reduce our environmental impact and positions us as a leader in drilling technology solutions.

ST-1200 AND ST-1500 RIG COMPATIBILITY

Increases Visual Acuity

LED light spectrum replicates daylight decreasing eye fatigue and increasing color recognition.

Minimize Third-Parties

Minimize the requirement for third-party light tower rentals.

Diesel Displacement and Lower Emissions

Reduce carbon footprint and costs through reduction of multiple light tower generators; photocell activated lights utilize excess generated rig power.

Neighborhood Friendly

Overhead directional lighting evenly covers all traffic areas of the location and minimizes external light spillage.
